HOSET

ABOUT US

Hoset is a Ukrainian brand that has been specializing in the manufacturing of cast marble sanitary ware for more than 10 years. The company has its own manufacturing facility located in the city of Dnipro.

We use unique equipment that has no analogues in the world. Each of our products is a unique masterpiece, which was worked on by a team of designers and technologists.

Every detail is carefully thought out, because our philosophy is the design and manufacturing of sanitary ware that is elegant and, at the same time, practical in everyday life.

The company's mission is to promote the concept of a new bathroom and kitchen, which correspond to the rhythms of modern life.

And we are sure that in Ukraine we can manufacture sanitary ware, the quality of which is not inferior to the best world brands! Today, Hoset products are presented in more than 20 countries of the world.

In 2022, we opened a branch in Poland. From now on, Hoset is even closer to you.
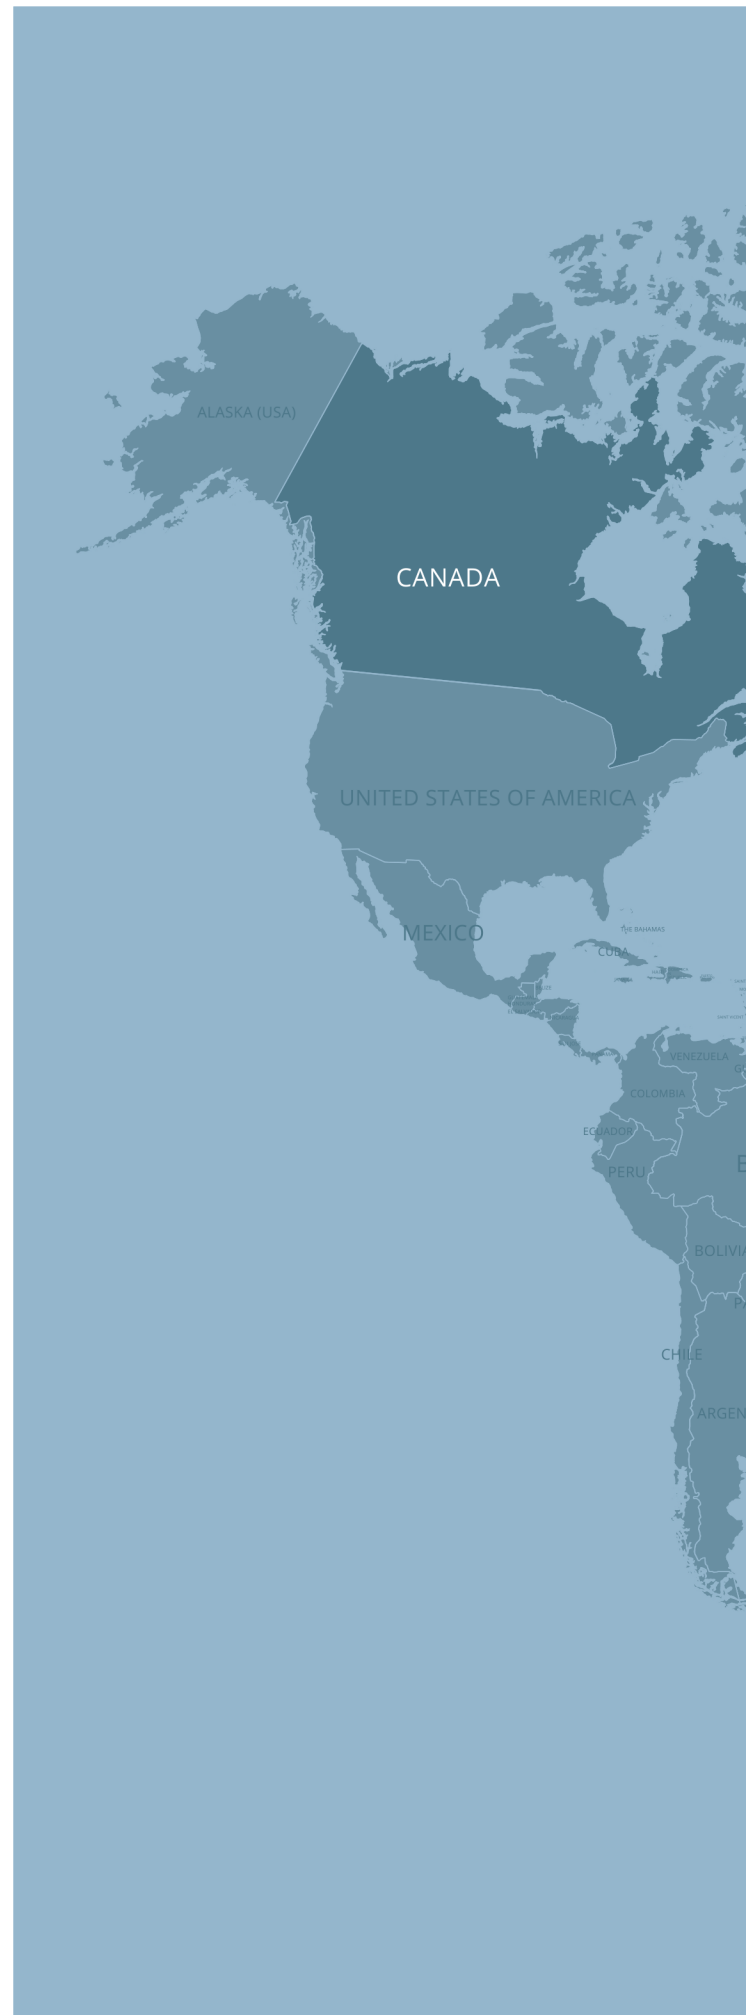

HOSET

Every year we increase the number of clients in di erent parts of the world. Hoset started a revolution in the field of bathrooms, o ering unique designs and a variety of technological solutions.

LABORATORY

Hoset products meet the standards and requirements for plumbing products, which are approved both within the country and abroad

We have our own laboratory on the territory of the production facility. It ensures the high quality of products and constantly works on the introduction of innovations and the search for new technologies. Laboratory employees test the physical and chemical properties of all the materials that mixtures consist of.

ISO
9001

CE 15
THE DECLARATION OF CONFORMITY

CAST MARBLE

Marble (from ancient Greek - "white shining stone") is a metamorphic rock that consists only of calcite. During recrystallization of dolomite, dolomite marble is formed.

Due to the technology developed by Hoset specialists, the stone, which was formed millions of years ago, is transformed into high-quality modern sanitary ware. The combination of ground marble and polyester resin creates products of an elegant shape with unique technical characteristics.

MIRAMARBLE technology cast marble products

Cast marble is a hard and durable material. The main component of the mixture is ground marble crumb, which is mixed with binding polyester resins. The outer surface of the products is covered with **Gelcoat ISO NPG** antibacterial gel, which makes the products durable and snow-white.

At the final stage of manufacturing, to add a glossy shine, the product is polished with a special paste. Glossy products are unpretentious in everyday life.

To obtain a velvet-matt surface, we polish the products with a paste with a matt finish. Such products are pleasant to the touch, but have a more porous structure, and therefore require more careful maintenance.

0.8 – 1.2 mm gelcoat coating

12-25 mm stone mass = ground marble + polyester resin

❘BAUXITE

Bauxite is a sedimentary
rock consisting mainly of
aluminum oxides and hydroxides, as
well as iron oxide and various impurities (clay
particles). Bauxites are very diverse in their external
outlook. Their color is usually red. Brownish-brown, rarely
gray, white, yellow, black. The name comes from the area of
Les Beaux-de-Provence in southern France, rich in
bauxite deposits. This rock is only mined
in 18 countries of the world.

White bauxite is used in the manufacture of
MIRASOFT sanitary ware. Only polyester resin is
additionally added. It is bauxite that gives
plumbing products their white color and velvety
texture. The material is antibacterial
and is even used in the
medical field.

Hoset technology bauxite products

HOSET IS A NEW TECHNOLOGY FOR THE PRODUCTION OF SANITARY WARE WITH AN IMPECCABLY MATT FINISH

The new material includes 80% bauxite and 20% polyester resin with additives.

Bauxite is a natural material that is processed and mixed with resin.

Due to its properties, bathtubs, washbasins and shower trays are as hard as stone, but have a pleasant matt surface.

Sanitary ware manufactured using HOSET technology is matt and uniform over the entire thickness of the product.

ADVANTAGES OF MIRASOFT PRODUCTS:

Easy care — you only need a sponge (abrasive part) and a detergent.

Durability — we have a 10-year warranty on all our products we assure you that the product will

not
lose its original appearance.
Impact resistance. The material is resistant to mechanical impact.

Repairability. Not deep scratches are cleaned with the abrasive side of a sponge or sandpaper. Deep chips can be repaired with our repair kit.

Warm surface. The material takes room temperature.

12-25 mm stone mass = bauxite + polyester resin

COLORED PRODUCTS

To obtain an individual design of sanitary ware, you can choose any shade from the RAL palette, which is applied to the outer surface of the products. Such a product can also have a matt or glossy finish.

Before coloring the product, upon request, our specialists can provide painted samples so that you get the exactly expected result.

MIRALIGHT technology lightweight bathtubs and washbasins

We achieved this e ect by adding microspheres to the ground marble mixture.

All technical characteristics of cast marble products remain unchanged, except for weight, which is reduced by 30%.

WHAT ARE THE MAIN ADVANTAGES OF LIGHTWEIGHT PLUMBING?

* This technology is used only for cast marble products (Miramarble and Miramarble MATT)

Product weight is reduced by
30%

It has increased wear resistance

Heat preservation increases by
40%

It is distinguished by high indicators of thermal and sound insulation

MIRAMARBLE technology

Heat preser vation

Cast marble is superior to natural stone in terms of its properties. A distinctive property of the material is low thermal conductivity. The products we manufacture maintain an optimal temperature for a long time. Their surface is always warm to the touch and this ensures a comfortable stay in the bath.
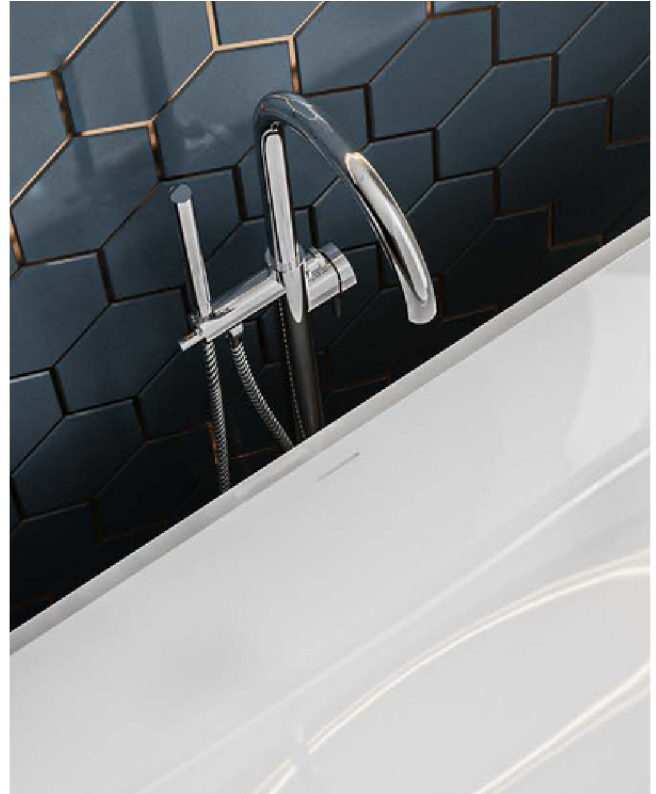

Antibacteri al coating

Each product is covered with a protective layer - Gelcoat ISO NPG antibacterial gel. This coating prevents the reproduction of harmful bacteria and germs on the surface of the products.

Noise insulation

The mineral composite provides the product with a high level of noise absorption. This feature is due to the high density of material particles. The absence of the sound of water falling on the surface of the product significantly increases comfort and convenience when using plumbing products.

Durability of the material

Cast marble is a unique material in which marble is mixed with polyester resin. In this way, impact resistance, resistance to the influence of temperatures of UF rays is ensured. Due to the properties of the material, with proper care, plumbing fixtures made of cast marble will last for many years.

Design sophistication

The structure of the material allows you to use a wide variety of shapes and curves when modeling products. That is why we can provide the buyer with various models for every taste.

Size fl exibility

All products are produced with a tolerance of 0-3 mm and a minimum radius of 2 mm. The properties of the material allow you to adjust the dimensions of the product by cutting the material. Therefore, you will always receive a product of the required size.

QUARTZ SAND

Quartz sand is a material obtained by extracting and classifying natural rolled sand, or by crushing and screening rock that contains silicon.

Quartz sand has high heat resistance, does not enter into chemical reactions with other substances.

MIRASTONE technology kitchen sinks made of quartz sand

Hoset kitchen sinks consist of 80% quartz sand and 20% polyester resin, which ensures the durability of our products. The sink withstands a temperature drop from -65°C to +65°C and is not exposed to aggressive household dyes.

Kitchen sinks have a uniform texture and color. They do not absorb odors, repel grease and dirt, and do not change color during use.

Under the conditions of proper care, a kitchen sink made of quartz sand will last for many years, without changing its technical characteristics and excellent appearance.

Each model is produced in 6 trendy colors. Due to the variety of colors, you can easily choose the shade you need!

*Color palette is on p. 99
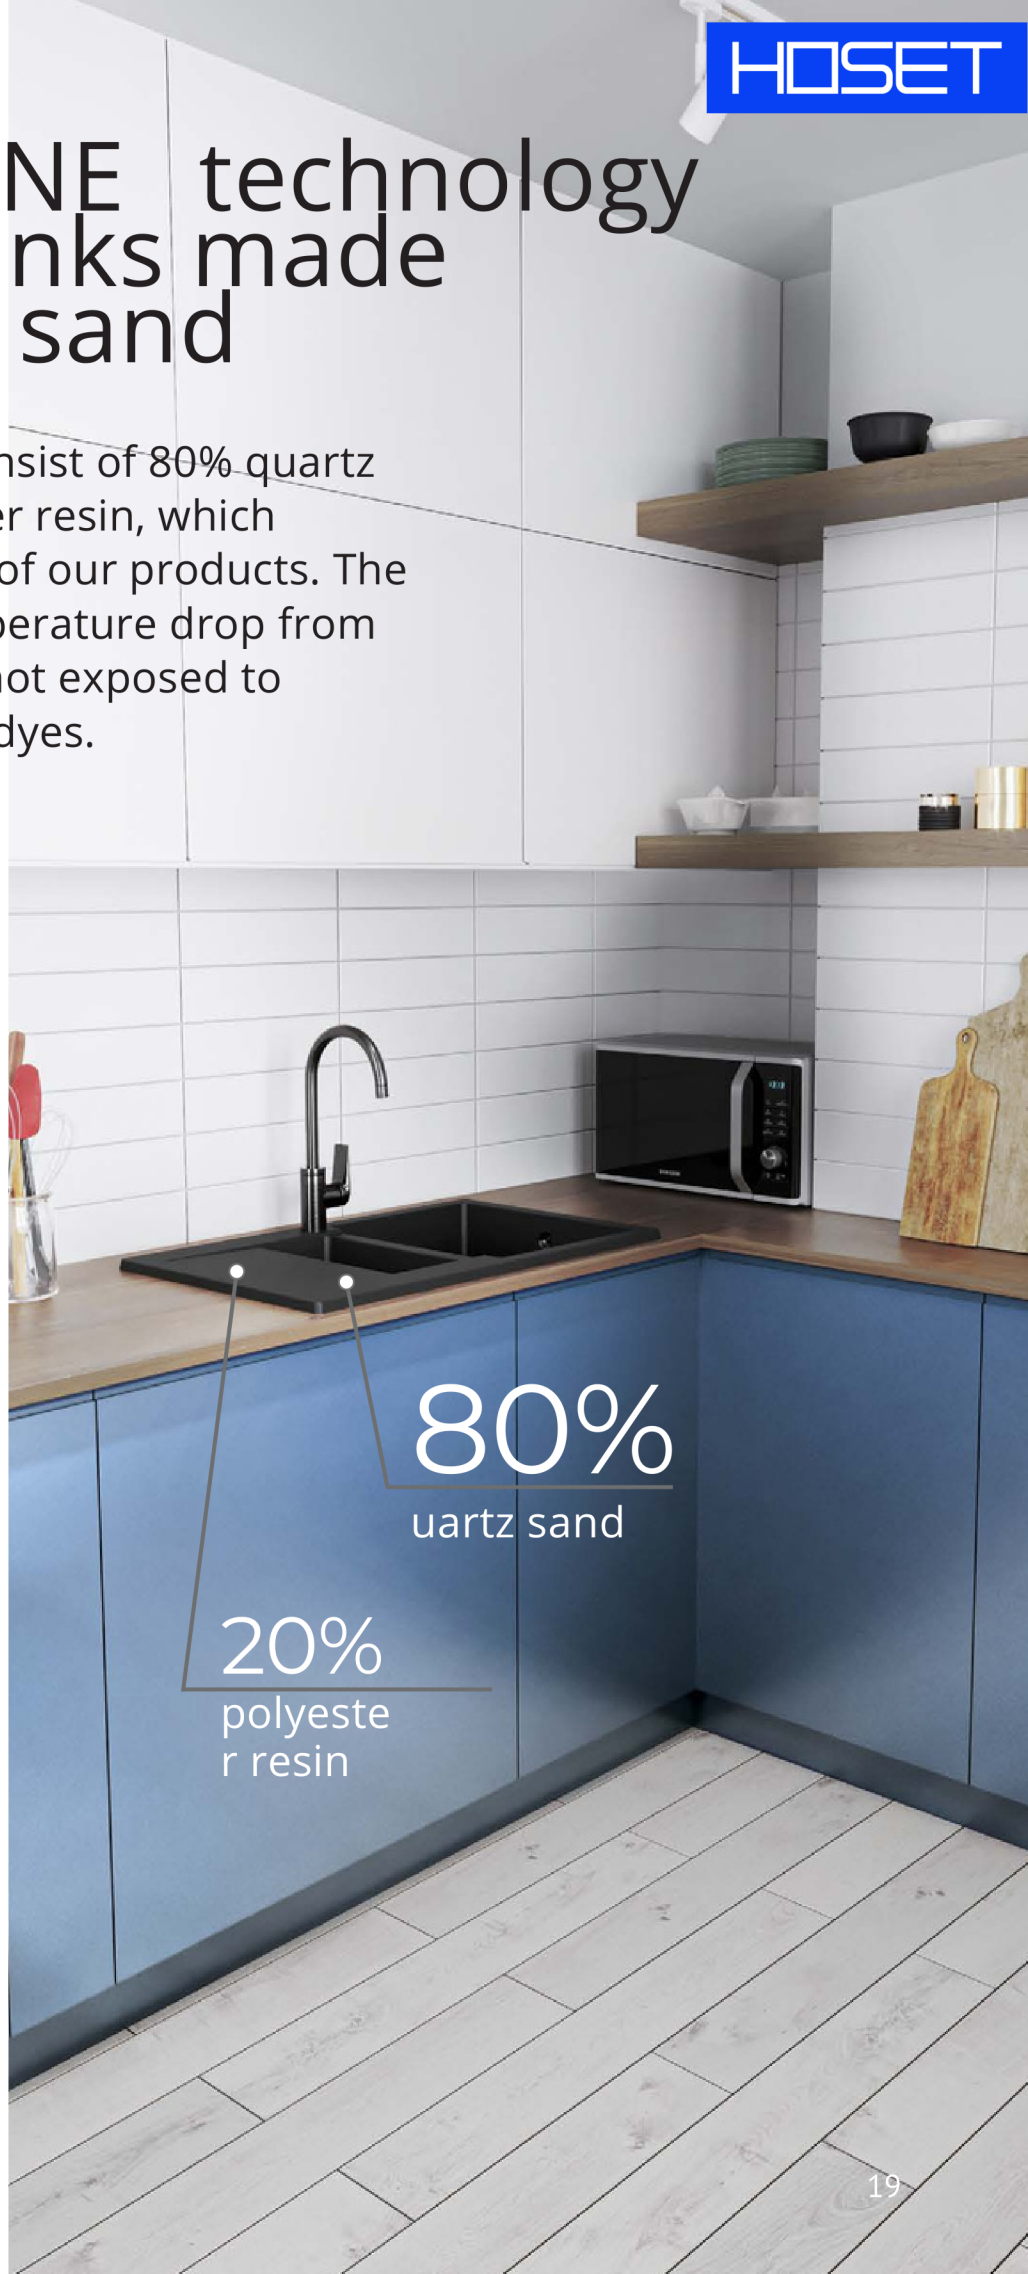

80%
uartz sand

20%
polyeste r resin

MIRASTONE technology

Resistance to household dyes

Due to the absence of pores on the surface of the products, food and chemical dyes can't penetrate inside the stone, and therefore they are easily washed away, leaving no traces or stains.

Easy care

Any detergent that does not contain abrasive particles can be used to clean the surface. Composite sinks are not afraid of the e ects of hydrochloric and phosphoric acids, ammonia, hydrogen peroxide and iodine solution.

High strength of the material

According to this parameter, artificial stone exceeds its natural counterpart and even concrete. Dropping a fork, knife or iron utensils will not leave any cracks or chips on the sink. Deformations and bends due to mechanical loads will not occur on the product, and with proper care, the sink will last for at least 30 years.
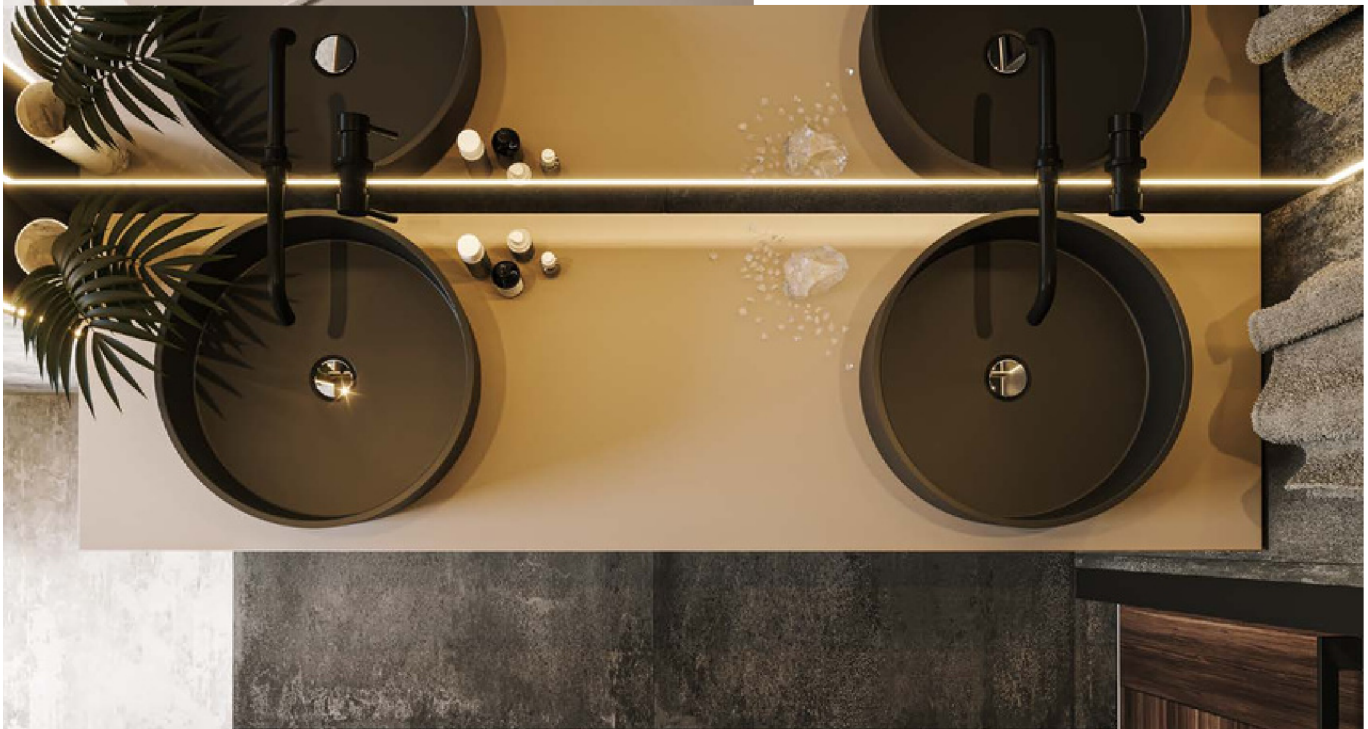

Hygiene

The surface of a quartz sand sink or washbasin is devoid of pores, so contamination will not accumulate on the product. No dirt – no harmful bacteria, plaque or bad smell.

WASHBASINS AND SHOWER TRAYS
made of quartz sand

A quartz sand washbasin or tray creates an interior accent that requires special attention. Black or gray quartz sand is most often used in the manufacture of these products

Such sinks harmonize perfectly with wooden cabinets or tabletops. The combination of colored sanitary ware and wood will create a truly cozy atmosphere in the bathroom.

Additional services:	color coating according to the RAL palette, making an inspection hole

ISLAND

Base material	miramarble
Coating	glossy
Overall dimensions, mm	1690 x 800 x 575
Bowl depth, mm	425
Volume, l	360
Net weight, kg	150,0
Gross weight, kg	209,0
Over flow	not available
Installation type	near-wall
Equipment	bathtub, siphon, booklet
Bathtub is made in technologies:	mirasoft, miramarble matt
Additional services:	color coating according to the RAL palette, making an inspection hole

MADDALENA

Base material	miramarble
Coating	glossy
Overall dimensions, mm	1749 x 850 x 600
Bowl depth, mm	460
Volume, l	400
Net weight, kg	163,1
Gross weight, kg	222,1
Over flow	not available
Installation type	near-wall
Equipment	bathtub, siphon, booklet
Bathtub is made in technologies:	mirasoft, miramarble matt
Additional services:	color coating according to the RAL palette, making a hole for the faucet

MADONNA

Base material	miramarble
Coating	glossy
Overall dimensions, mm	1800 x 800 x 600
Bowl depth, mm	460
Volume, l	400
Net weight, kg	172,0
Gross weight, kg	231,0
Over flow	integrated
Installation type	freestanding
Equipment	bathtub, siphon, booklet
Bathtub is made in technologies:	mirasoft, miramarble matt
Additional services:	color coating according to the RAL palette, making an inspection hole

MALDIVES

Base material	miramarble
Coating	glossy
Overall dimensions, mm	1700 x 770 x 580
Bowl depth, mm	436
Volume, l	310
Net weight, kg	142,3
Gross weight, kg	201,3
Over flow	integrated
Installation type	freestanding
Equipment	bathtub, siphon, booklet
Bathtub is made in technologies:	mirasoft, miramarble matt
Additional services:	color coating according to the RAL palette

MARINA

Base material	miramarble
Coating	glossy
Overall dimensions, mm	1745 x 725 x 756
Bowl depth, mm	410
Volume, l	310
Net weight, kg	165,8
Gross weight, kg	233,0
Over flow	integrated
Installation type	freestanding
Equipment	bathtub, siphon, booklet
Bathtub is made in technologies:	mirasoft, miramarble matt
Additional services:	color coating according to the RAL palette, making an inspection hole

MATEO

Base material	miramarble
Coating	glossy
Overall dimensions, mm	1800 x 870 x 560
Bowl depth, mm	420
Volume, l	410
Net weight, kg	160,4
Gross weight, kg	219,4
Over flow	integrated
Installation type	freestanding
Equipment	bathtub, siphon, booklet
Bathtub is made in technologies:	mirasoft, miramarble matt
Additional services:	color coating according to the RAL palette, making an inspection hole

MELBOURNE

Base material	miramarble
Coating	glossy
Overall dimensions, mm	1685 x 760 x 548
Bowl depth, mm	415
Volume, l	310
Net weight, kg	131,5
Gross weight, kg	190,5
Over flow	not available
Installation type	freestanding
Equipment	bathtub, siphon, booklet
Bathtub is made in technologies:	mirasoft, miramarble matt
Additional services:	color coating according to the RAL palette, making an inspection hole

MOLLY

Base material	miramarble
Coating	glossy
Overall dimensions, mm	1600 x 810 x 605
Bowl depth, mm	460

	200
Net weight, kg	7,24
Gross weight, kg	8,5
Installation type	mortise/under the countertop
Equipment	kitchen sink, mounting kit, siphon, booklet
Available colors:	black, white, gray, terra, sand, jasmine

HANOI 560

Base material	mirastone
Number of bowls	one main
Overall dimensions, mm Bowl depth, mm	560 x 505 x 220
	200
Net weight, kg	9,53
Gross weight, kg	10,5
Installation type	mortise/under the countertop
Equipment	kitchen sink, mounting kit, siphon, booklet
Available colors:	black, white, gray, terra, sand, jasmine

HANOI 760

Base material	mirastone
Number of bowls	one main
Overall dimensions, mm	760 x 505 x 220
Bowl depth, mm	200
Net weight, kg	13,15
Gross weight, kg	14,8
Installation type	mortise/under the countertop
Equipment	kitchen sink, mounting kit, siphon, booklet
Available colors:	black, white, gray, terra, sand, jasmine

LAGOON 420

Base material	mirastone
Number of bowls	one main
Overall dimensions, mm	419 x 508 x 215
Bowl depth, mm	200
Net weight, kg	9,22
Gross weight, kg	11,3
Installation type	mortise/under the countertop
Equipment	kitchen sink, mounting kit, siphon, booklet
Available colors:	black, white, gray, terra, sand, jasmine

LAGOON 540

Base material	mirastone
Number of bowls	one main
Overall dimensions, mm	541 x 511 x 215
Bowl depth, mm	200
Net weight, kg	10,85
Gross weight, kg	12,45
Installation type	mortise/under the countertop
Equipment	kitchen sink, mounting kit, siphon, booklet
Available colors:	black, white, gray, terra, sand, jasmine

LAGOON 760

Base material	mirastone
Number of bowls	one main
Overall dimensions, mm	760 x 460 x 215
Bowl depth, mm	200
Net weight, kg	17,4
Gross weight, kg	18,45
Installation type	mortise/under the countertop
Equipment	kitchen sink, mounting kit, siphon, booklet
Available colors:	black, white, gray, terra, sand, jasmine

LAPAS

Base material	mirastone
Number of bowls	one main + one additional
Overall dimensions, mm	786 x 489 x 203
Bowl depth, mm	185
Net weight, kg	17,4
Gross weight, kg	18,45
Installation type	mortise
Equipment	kitchen sink, mounting kit, siphon, booklet
Available colors:	black, white, gray, terra, sand, jasmine

LISA

Base material	mirastone
Number of bowls	one main
Overall dimensions, mm	558 x 498 x 235
Bowl depth, mm	222
Net weight, kg	11,8
Gross weight, kg	13,85
Installation type	mortise/under the countertop
Equipment	kitchen sink, mounting kit, siphon, booklet
Available colors:	black, white, gray, terra, sand, jasmine

MALIBU

Base material	mirastone
Number of bowls	one main
Overall dimensions, mm	Ø 513 x 219
Bowl depth, mm	205
Net weight, kg	7,2
Gross weight, kg	9,25
Installation type	mortise
Equipment	kitchen sink, mounting kit, siphon, booklet
Available colors:	black, white, gray, terra, sand, jasmine

ORLEAN

Base material	mirastone
Number of bowls	one main
Overall dimensions, mm	861 x 496 x 220
Bowl depth, mm	197
Net weight, kg	15,3
Gross weight, kg	15,8
Installation type	mortise
Equipment	kitchen sink, mounting kit, siphon, booklet
Available colors:	black, white, gray, terra, sand, jasmine

TULUZA

Base material	mirastone
Number of bowls	one main
Overall dimensions, mm	Ø 525 x 493 x 204
Bowl depth, mm	185
Net weight, kg	8,3
Gross weight, kg	8,6
Installation type	mortise
Equipment	kitchen sink, mounting kit, siphon, booklet
Available colors:	black, white, gray, terra, sand, jasmine

VALENCIA

Base material	mirastone
Number of bowls	one main
Overall dimensions, mm	Ø 525 x 196
Bowl depth, mm	182
Net weight, kg	7,0
Gross weight, kg	7,25
Installation type	mortise
Equipment	kitchen sink, mounting kit, siphon, booklet
Available colors:	black, white, gray, terra, sand, jasmine

VERMONT

Base material	mirastone
Number of bowls	one main
Overall dimensions, mm	770 x 500 x 182
Bowl depth, mm	165
Net weight, kg	9,9
Gross weight, kg	11,35
Installation type	mortise
Equipment	kitchen sink, mounting kit, siphon, booklet
Available colors:	black, white, gray, terra, sand, jasmine

VERSAL

Base material	mirastone
Number of bowls	one main

B2B - OFFICE for partners

Since the beginning of 2022, the Miraggio company has been operating a B2B o ce for the company's partners. If you haven't worked in it yet, you're missing out!

This is not a standard basic cabinet, like in many other companies. Our o ce, refined according to the feedback of partners, is constantly supplemented with new functionality. We listen to everyone and implement a convenient interface that will facilitate work and communications with our company.

In the B2B of f ice you have access to:

• Catalog of standard goods and individual orders with actual cost

• Work as a whole team with di erent levels of access

• Mutual settlements with the company and the amounting kit of the discount

• Status of orders and package of documents (bill, invoice)

• Formation of commercial o ers, prices

• Creating your own directory of delivery addresses

• Calculation of the terms of order readiness

• API for integration

This is only a part of the functionality, there is an update every month. The most important thing is that the o ce saves your time and provides maximum information for quick customer ser vice.

To register and work in the B2B o ce, you need:

• Provide the establishing documents of your FOP/LLC and data at the manager's request.

• Provide our manager with email addresses of your team

employees and specify the level of access (manager or salesperson).

*Manager — has access to all documentation and functionality

 The seller — has access only to the catalog and prices of the RRP, is not able to place an order

• Take training online or of f line.
